

## **Luke Scott Love**

### **Company- Dreamscience**

### **Job Title- Senior Workshop Engineer**

#### **Why did you choose this Career?**

I chose this career due to being introduced to the motor trade by Kelvin Hall School. I was then offered a placement in my line of work from work experience in year 10 and was in contact with the company since; this resulted in me having a full-time job since the day I left school. I chose to follow the school's guidance because it was a place of work that really interested me.

#### **What pathway did you follow, why was this the most appropriate for you?**

I took on a light vehicle repair and maintenance NVQ as my pathway because it suited me in the line of work, and it would give me the qualifications to become qualified in my chosen profession within 3 years. I anticipated that gaining this would help me be independent in my workplace.

#### **What is the best thing about your job?**

The fact that I enjoy what I do daily. It is so easy to just get a job, but if you do not enjoy it you are bound to not be in that placement for long or be successful I get a sense of fulfilment when at work, this makes it easier to learn and go the extra mile.

#### **What advice would I give my 16 year old self?**

Keep your head down and work as hard as you can. The harder you work now the easier it will be in the years to come!
